

In th Claims:

Please amend the claims as follows:

Claim 1 (cancelled).

Claim 2 (canceled)

5 Claim 3 (canceled)

Claim 4 (new) An outrigger holder apparatus comprising a mounting means for mounting an
outrigger holder on a T-top of a boat; said mounting means further comprising
a housing means for fixedly mounting the outrigger holder apparatus on said T-top;
an outrigger holder means mounted in said housing means for rotation therein;
10 a bearing means engaging said outrigger holder and said housing means for providing a
bearing therebetween positioned above the "T" top to bear the weight of the outrigger holder
above the "T" top upon rotation of the outrigger holder;
said mounting means for the outrigger holder further comprising an indexing means for
adjusting the position of the outrigger holder means to a plurality of fixed positions in a
15 horizontal plane from underneath the "T" top upon which the outrigger holder means is
mounted;
said indexing means having a first portion engaging said housing means for rotation
therewith and a second portion for selectively engaging and disengaging with said first
portion; said second portion when disengaged being positioned to engage and rotate said
20 outrigger holder means without bearing the weight of the outrigger holder means.

Claim 5 (new) The outrigger holder apparatus of Claim 4 further comprising a release and turning
mechanism engaging said mounting means for the outrigger holder means for moving the outrigger
holder to and holding the outrigger holder in, a plurality of fixed horizontal positions.

Claim 6 (new) The outrigger holder apparatus of Claim 5 wherein the release and turning mechanism
25 further comprises a lock engaging said outrigger holder and said mounting means; said lock being
movable to disengage said lock from said mounting means and thereby allow said lock to be rotated
in a horizontal plane to rotate the outrigger holder to a different fixed position.
